- Adult Criminal Justice
- Adult Mental Health
- Child Mental Health
- Child Welfare
- Early Education
- General Prevention
- Health
- Higher Education
- Juvenile Justice
- Substance Use Disorder
Clearinghouse Database
Evidence-based means…

Programs or practices whose level of effectiveness has been determined by rigorous evaluations.

- Evidence-based programs can be ineffective or even have a negative impact.

- Where is the evidence?
  - Jurisdiction-specific evaluation
  - Clearinghouses
What are clearinghouses?

• Identify “what works”

• Review and summarize rigorous evaluations of different programs and practices

• Assign ratings to programs and practices based on the evidence (e.g., model, promising, mixed effects)

• Use slightly different methodologies, criteria, and terminology

• Policy area specific
  – What Works Clearinghouse = Education
  – CrimeSolutions.gov = Criminal & Juvenile Justice
Results First Clearinghouse Database

- Contains information from 9 clearinghouses
- Features over 2,500 programs and practices
- Allows users to search and filter by categories and settings
  - Links to program page
- Provides brief description, key details, and rating from clearinghouse
  - Applies Results First rating color
Results First Clearinghouse Database

The Pew-MacArthur Results First Initiative created the Results First Clearinghouse Database to provide users with an easy way to access and understand the evidence base for programs in social policy areas such as behavioral health, criminal justice, education, and public health. More specifically, it allows users to see if there have been rigorous evaluations of a program and, if so, to review information on the program's effectiveness.

The database compiles and displays key information from nine national clearinghouses, including the rating they assigned to each program and the program's description, outcomes, setting, and target population (where available). It also contains a link back to the program's original source page on the clearinghouse website so that users can obtain additional details.

Clearinghouses develop this information by reviewing and summarizing rigorous evaluations of programs within their focus area. Then, they assign a rating to each program using their own methodology and terminology (such as top tier, effective, positive, and model).

The database applies color-coding to the clearinghouses' distinct rating systems, creating a common language that allows users to quickly see where each program falls on a spectrum from negative impact to positive impact. This coding consists of five rating colors that correspond to different levels of impact as shown below.

Targeted Evaluation
Wellness Recovery Action Plan (WRAP)

Wellness Recovery Action Plan (WRAP) is a manualized group intervention for adults with mental illness. WRAP guides participants through the process of identifying and understanding their personal wellness resources ("wellness tools") and then helps them develop an individualized plan to use these resources on a daily basis to manage their mental illness. Wellness Recovery Action Plan

ME Copeland - 1999 - vqjyvmp03 storage googleaps

Learning self help skills for dealing with physical and emotional symptoms can be simple... but it's a much greater challenge using self help methods during the most difficult times... when they can help the most and incorporating them into daily life. This book presents a...

Wellness Recovery Action Plan: A system for monitoring, reducing and eliminating uncomfortable or dangerous physical symptoms and emotional feelings

ME Copeland - Occupational Therapy in Mental Health, 2002 - Taylor & Francis
This article describes a popular and effective self monitoring and response system that was developed in 1997 by 30 people who attended an eight day mental health recovery skills seminar in Vermont. They developed the system in response to their need for a structured...

Effect of Wellness Recovery Action Plan (WRAP) participation on psychiatric symptoms, sense of hope, and recovery

S Fukui, VR Stamino, M Spero - Psychiatric Services, 2011 - psycnet.apa.org
Objective: Self-management of psychiatric illness is a central tenet of consumer-directed mental health treatment. While several manualsized self-management programs have been developed in recent years, the most widely disseminated is the Wellness Recovery Action Plan...

Wellness recovery action plan & peer support: Personal, group and program development

ME Copeland - 2004 - Peach Press

Results of a randomized controlled trial of mental illness self-management using Wellness Recovery Action Planning

JA Cook, ME Copeland, JA Jonkás - Schizophrenia Research, 2011 - academic.oup.com
Abstract. The purpose of this study was to determine the efficacy of a peer-led illness self-management intervention called Wellness Recovery Action Planning...
Results are listed in two groups: Newly reviewed programs and Legacy programs. Legacy programs refer to the 356 programs that were on the NREPP website as of September 2015. The program profiles of each are displayed in different formats.

**Newly Reviewed Programs**

This section lists programs that were reviewed under the new review criteria that took effect after September 2015.
