

## 2015-2016 State Legislation to Require Prescription Drug Cost and Price Transparency

Legislation and status as of Nov. 7, 2016

Compiled by Richard Cauchi, NCSL Health Program, Denver

---

During 2015-2016 state legislative sessions, **bills to require prescription drug cost and price transparency** are using at least three distinct approaches. This report provides descriptions in three sections:

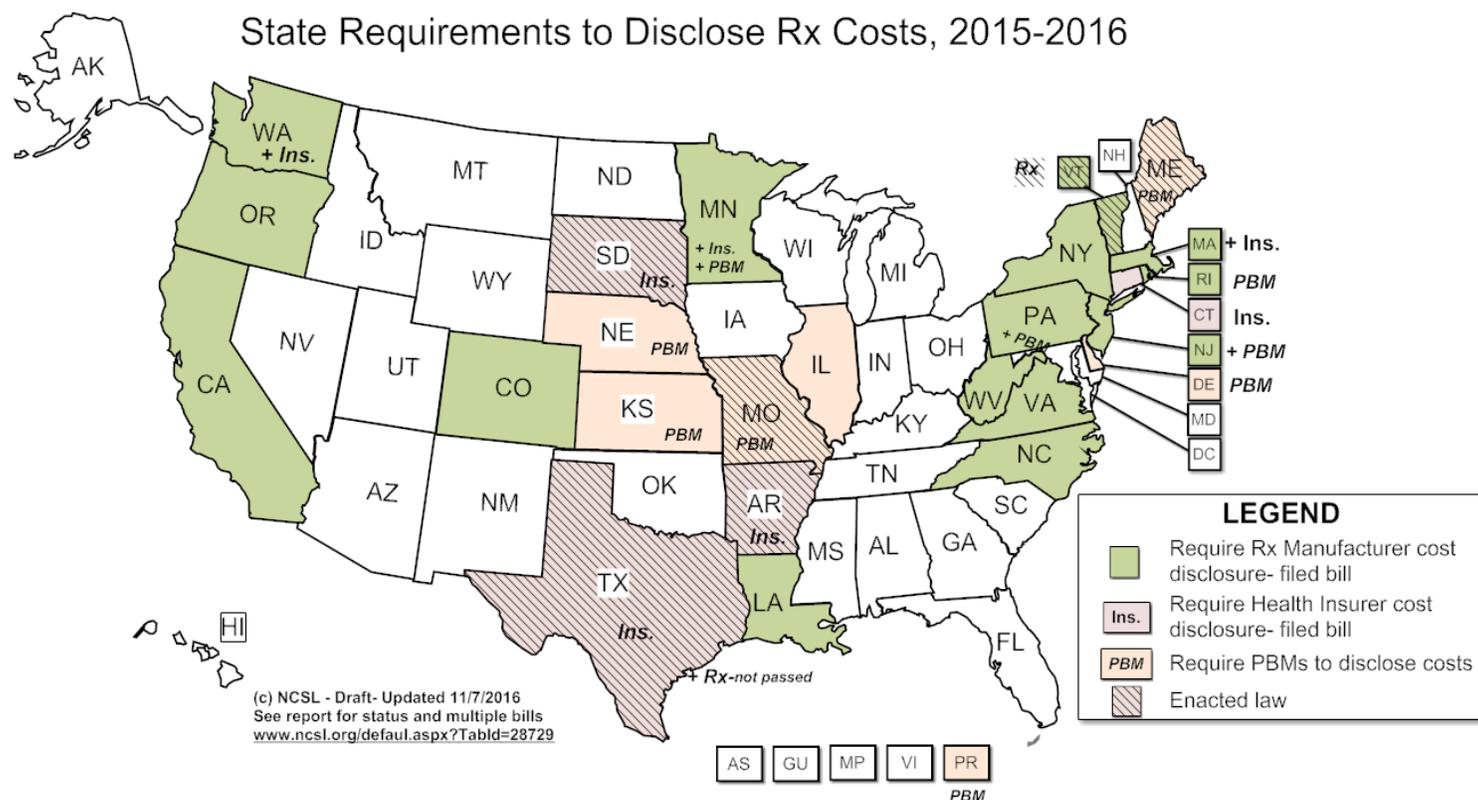

1. **Prescription drug manufacturer** transparency requirements were filed in at least 16 states—**California, Colorado, Louisiana, Massachusetts, Minnesota, New Jersey, New York, North Carolina, Oregon, Pennsylvania, Rhode Island, Texas, Vermont** (signed into law 6/3/2016), **Virginia, Washington and West Virginia**. Provisions often include an annual report by manufacturers on higher-cost products (such as \$10-50k or more annually).
2. **Health Insurer** requirements to provide product price and access transparency were enacted and signed into law in at least three states: **Arkansas, South Dakota and Texas**. **In addition**, bills were filed or pending in **Connecticut, Massachusetts, Minnesota, Vermont and Washington**.
3. **Pharmacy Benefit Manager (PBMs)** transparency requirements were also filed in at least **12 states: Delaware, Illinois, Kansas, Maine, Massachusetts, Missouri, Nebraska, Minnesota, New Jersey, Pennsylvania, Puerto Rico and Rhode Island**. The 2016 bills in **Delaware, Maine and Missouri** have been signed into law.

**Note on Bill Status:** A few bills still are pending in 2016. The measures listed are based on full-text searches of 50-state bills; these should be treated as extensive examples but not necessarily a final count of states. As usual, bills are filed, amended and/ or withdrawn on a regular basis. For latest steps, use the NCSL Database, described below.

#### Health Care: Prescription Drug Costs

**Status:** Failed - Adjourned

**Date of Last Action:** 3/30/2016

**Author:** Hernandez (D)

**Summary:** Rx Transparency: Requires a drug manufacturer to inform state purchasers, health care service plans, health insurers and chairs of specified legislative committees about increases of 10 percent or more in the wholesale acquisition

cost of drugs and of the introduction to market of a prescription drug that has a wholesale acquisition cost of \$10,000 or more annually or per course of treatment, and report specified information regarding the drug price. Requires health insurers that file rate information to report the 25 most frequently prescribed drugs and the average wholesale price for each drug and the 25 most costly drugs by total plan or insurer spending and the average wholesale price for each drug. Relates to submission of rate increases for all large group benefit plans. Failure to comply in 30 days may result in a civil penalty of \$1,000 per day.

The California **Drug Price Relief Initiative (#15-0009)\*** will be on the California ballot as an initiated state statute on Nov. 8, 2016. This initiative was designed to restrict the amount that any state agency could pay for drugs, tying it to the price paid by the U.S. Department of Veterans Affairs, an organization that falls under certain state laws regarding drug price negotiations. The measure would apply in any case in which the state ultimately provides funding for the purchase of drugs, even if the drugs are not purchased directly by a government agency.

A "yes" vote would regulate drug prices by requiring state agencies to pay the same prices as the U.S. Department of Veterans Affairs pays for prescription drugs. A "no" vote would reject the initiative.

**Transparency and Cost Control of Pharmaceutical Drug**

**Author:** Montigny (D)

**Status:** Pending – inactive study to end of 2016 session

**Summary:** Promotes transparency and cost control of pharmaceutical drug prices. Requires that a state commission "shall develop a list of critical prescription drugs for which there is a substantial public interest in understanding the development of its pricing. In developing the list, the commission shall consider the following factors: (i) the cost of the drug to public health care programs, including the office of Medicaid and the group insurance commission; (ii) the current cost of the drug in the commonwealth; (iii) the extent of utilization of the drug within the Commonwealth; and (iv) potential impact of the cost of the drug on the commonwealth's achievement of the statewide health care cost growth benchmark."
